Children first learn to speak and then to read. In this book they will learn to play first and then to read music. The risk of creating an artificial rhythm is avoided when playing becomes a spontaneous gesture. Artificial rhythm is simply the result of the reading of musical values; once it is avoided you can play whatever you want with greater enthusiasm and creativity.

MAESTRI DELLA CHITARRA - Guitar Masters

A series of monographs on the most important authors of guitar education literature.
Scientific committee directed by Filippo Michelangeli, members: Giovanni Podera and Giulio Tampalini.

Each publication originates from a meticulous philological research on sources and a well-thought-out selection of works, presented in progressive difficulty, in order to make them fully performable.

In the enclosed CDs, all selected works are interpreted by virtuoso guitarist Giulio Tampalini: a precious source of inspiration and a challenging point of comparison for students.

Thanks to its prestige, the Guitar Masters series is an excellent reference point for the preparation of Conservatory exams and international competitions.

The 25 Etudes Méloiques Progressives Op. 60 – his best known and most admired works – are still fundamental to the training of the guitar student today, thanks to the variety and distinctiveness of their technical and instrumental structure, and to their fluent melodic line, supported by a clear harmonic and stylistic framework.

It plays a major role not only for educational purposes but also in concerts. The revision and fingering are based on the original transcripts published around 1822 by the publisher Artaria in Vienna and in 1825 by Richault in Paris.

Domenico SCARLATTI
14 SONATE
14 Sonatas transcribed for guitar by Wolfgang Lendle e Alberto Mesirca. With CD
The intent of the editors is to transform the original version for piano to guitar "attire", making it idiomatically executable on the new instrument. The structure is streamlined to highlight the essence of Scarlatti's work and allow the performer to focus attention on the character of his music. Created as teaching material, the sonatas by Scarlatti maintain this purpose also in the version for guitar, where scales, unusual coordination movements, arpeggios or embellishments, remain a sort of instrumental challenge. CD with interpretation of pieces by Alberto Mesirca.

I CONCERTI CLASSICI E ROMANTICI PER VIOLINO E ORCHESTRA NELLE REVISIONI DI SALVATORE ACCARDO

Riduzione pianistica di Francesco Fiore

Classical and Romantic Concertos for violin and orchestra edited by Salvatore Accardo

Piano arrangement by Francesco Fiore

Introduction, with technical and artistic considerations by the editor in collaboration with Alberto Cantù.

The most important classic works for violin and orchestra presented through the reading and interpretation of a great master.

A new critique based on in-depth musicological research and a rigorous comparison of sources, aimed at favouring the original writing of the composer in relation to notation, musical articulations and moods. Any intervention or suggestion made by the editor is highlighted, also in the case of the fingerings, for which several options have been proposed. Attention is paid in particular to the piano arrangement for orchestra: musically and stylistically impeccable, it can also be performed by intermediate level pianists. Finally, in relation to the Cadenzas: when they are not indicated by the author, the most popular are highlighted along with the editor's original proposals (for the concertos of Mozart) and other less known but extremely interesting pieces (Saint-Saëns and Busoni for the concert of Beethoven).

A philological, highly interpretative, teaching work, finally available to all violinists: students, professionals and enthusiasts.

An authoritative reference point for addressing exam preparation, international competitions, auditions and concerts.

- Research and rigorous comparison of sources
- Tips on notation highlighted graphically
- Several fingering options
- Cadenzas: in the absence of the composer's suggestions there is a complete proposal of the most important, most performed and interesting (Accardo, Joachim. Franko, Saint-Saëns, Auer, Wieniawski, Vieuxtemps, Ysaÿe, Busoni)
- Arrangement for piano that is accessible and can be performed even by pianists at intermediate level (students)
- Introduction notes with technical and artistic notes by the editor
- **Italian and English texts** (useful for exams and international competitions)

Edizioni Curci, in association with Cidim, Comitato Nazionale Italiano Musica (Italian National Music Committee), is proud to present **The Mario Castelnuovo-Tedesco Collection**, the first series ever published entirely dedicated to the composer from Florence (1895-1968) who settled in the United States, where he became known as "the Maestros' Maestro". The collection is edited by

Angelo Gilardino, composer and scholar, who enjoys the full confidence of the Castelnuovo-Tedesco's estate.
The collection will present all of the musician's as yet unpublished works, which are housed at the Library of Congress in Washington DC, according to the original manuscripts. **Each volume has both Italian and English commentaries.**

DE MUSICA INVENTA - Lost Music from XVII to the XIX Centuries

As the title suggests, the music of our past returns to light, resurfacing from an undeserved silence. Music that is "lost" because it consists mainly of known material, which is sometimes incorrectly archived or abandoned in libraries and old collections. The intent is to provide "new" materials for those who, as scholars and musicians are always looking for repertoire to rediscover and perform.

Each volume complies with philological rigor to the original text and is accompanied by an introduction and historical musical time frame of the author in his socio-cultural context, a critical apparatus with eventual notes and corrections made by the editors, respecting the primary source and an updated bibliography on the composer.

This is a concise and easy-to-use book to help us understand the language of music. It explains its fundamental principles and gives readers the keys to active and intelligent listening. What are rhythm, dynamics, the character of a piece of music, the timbre of an instrument and how can we recognise them in a composition? And the melody, harmony and style of a musical work? What makes Bach's music different from Beethoven's? And how has musical language evolved?

This book answers these and many other questions with clear and straightforward explanations supported by a wealth of musical excerpts in order to help you identify the concepts you've learnt in the music itself.

Summary questions, which can be used to check your understanding, are included at the end of each topic and the book is full of interesting stories, information and anecdotes worth knowing.

A book to immediately learn how to discover the best of yourselves. If used in a proper way, it will lead you to multiple results, even outside of the musical sphere!

Finally, a book which explains how to apply NLP techniques to the psycho-physiological aspects of musical execution. It will help musicians to discover their potential, and to get the best out of their performances.

Based on twenty years of research, carried out by the authors themselves, *Master yourself* suggests a new path of study, which offers students, professionals, music lovers and teachers the most effective strategies to expand one's creative resources.

Through the use of meditations, examples and practical coursework, the musician will be able to develop the right tools to correctly track his/her own artistic and personal growth.

After reading this publication, the musician will be able to:

- Evaluate his/her personal ability
- Increase his/her attention and concentration
- Rehearse and improve his/her performance
- Overcome performance anxiety and control personal fear
- Fully manage his/her emotions and feelings
- Increase his/her self-esteem
- Define and effectively pursue personal objectives, thus getting rid of prejudice and external influences.

An interview with the great pianist Aldo Ciccolini completes the volume. He underlines the importance of such themes, based on his sixty-year-long and international experience.

Rachele MARAGLIANO MORI
COSCIENZA DELLA VOCE NELLA SCUOLA ITALIANA DI CANTO
Voice consciousness in the Italian school of singing

The reference manual for the study of singing. This book is unanimously considered one of the reference teaching manuals for the study

of singing. Rachele Maragliano Mori analyses the technical problems of the voice as an instrument in the light of scientific and music studies results, beginning with the examination of the fundamental principles of the classical school. Breathing, emission of breath, pronunciation and articulation, sound quality, register and passages, legato, mezza voce, falsetto, recitative, embellishments and gesture, are just some of the many issues examined via constant reference to the thinking of the great composers (from Caccini and Monteverdi to Rossini, Verdi, Wagner, Schoenberg, Nono, Berio) and teachers (Tosi, Mancini, Garcia, Lamperti, Silva). The attestations and anecdotes of critics and conductors (such as Mila, D'Amico, Toscanini and Gavazzoni), illustrious singers (like Caruso and Callas), speech therapists (Baglioni, Glover, Tarneaud, Husson) and successful ex-students, make the reading exciting and engaging.

The volume also contains a brief historical overview of the principal singing schools; a series of practical advice for the aspiring singer (when to start studying singing, how to overcome conflicts with their teachers, the necessary qualities to aspire to the profession); finally, a valuable note by Cathy Berberian on the modern voice.

An indispensable aid in the initiation of voice education, this book is also useful for those who wish to discover and enhance their attitude and begin studying singing.

INTRODUZIONE ALLA TECNICA DELLA DIREZIONE D'ORCHESTRA

Introduction to the orchestral conducting technique. With DVD. Italian, English, German, Spanish texts.

In accordance with the orchestral conducting school of Ilya Musin where Yuri TEMIRKANOV, Valery GERGIEV,

Semyon BYCHCOV, Sian EDWARDS, Martin BRABINS and Rudolf BARSHAI learned their craft.

With contribution from the piano duo Bruno Canino and Antonio Ballista

EC 11596 (ah)

Ilya Musin, probably the greatest teacher of orchestral conducting ever, has analyzed with definitive results the fundamentals of the connection between the gesture of the director and the production of sound from the orchestra.

Ennio Nicotra can be considered his evangelist, and even something more: not only has he assimilated Musin's teaching, he has also, thanks to a great didactic vocation, rationalized it better than anyone else among Musin's students.

Nicotra's lessons are useful to directors already well-established in their careers who are willing to question their convictions, to aspiring directors, to orchestral players who desire assurance in their profession, to musicians in general and to melomaniacs eager to understand the secrets of this difficult art.

Useful to:

- Students of orchestral conducting; aspiring directors
- Orchestral conductors
- Orchestral players
- Musicians in general

PIANO METHODS

LITTLE PIANO SCHOOL (al)
A music workshop for piano learning with toddlers. Includes teacher's guide and group activities
Author: Kim Monika Wright
Target: children up to 2 years
Pages: 175 (pupil's book)+56 (teacher's guide)
Size: 29,7x21 cm
EC 11479 - ISMN: 9790215904682
Italian, English and German texts

A music work-room where music teaching is an "active" method and music learning comes naturally. A complete teaching method which uses all the most suitable psychological and methodological approaches for developing communication and music skills in young learners: 7 fundamental aspects - colour, games, body movement, singing, memory, performance and communication and 8 game categories - note reading, developing a good music ear, treble and bass clef, fingering, duration of notes and pauses, reading and memorizing a composition, developing rhythm, inventing and improvising. Kim's suggestion to all teachers is to develop various objectives in every lesson, to use lots of activities and to play as many different games as possible so that different skills are tested.

Sonia PERINI

ALIGHIERO IN CONCERT. With CD

Easy duets for two violins adapted from symphonic, opera and violin classics. With CD (minus one) guide for playing duets, also at home and advice from the author.

This series addresses the study of the instrument through the famous classic repertoire from an early stage (first and second year of study).

Thanks to careful selection of adapted and simplified pieces, students approach progressive technical difficulties with ease and motivation. Performing their own part in a duet, with the teacher or a more advanced level student, young violinists will be involved in a musically complete and satisfactory performance and will experience the joy of making music together. The duets are graded according to their difficulty.

A brief introduction and biographical information on the composer are provided for each track, in order to stimulate the children's curiosity. Each book includes a CD GUIDE containing the recordings of all the duets. Thanks to the minus one system it is possible to exclude the playing of either of the two violin parts, to play with the accompaniment.
